# TOUGH TRUCKS FOR CONTAINER HANDLING APPLICATIONS

Hyster® are the experts in Empty Container Handlers, and at the forefront of the double handling market. Hyster are the first choice for the tank container market with innovative solutions including double handling for wide body loads. These are the ultimate tough trucks for the most demanding areas of operation, offering truly innovative solutions to make your operation run smoothly.

Hyster® has a long history of developing truck solutions to meet the particular requirements of our customers in every industry around the globe. We continue to lead the market in answering the very specific challenges of container handling environments, helping to keep our customers at the top of their industry.

## Innovation

Through a continuous product development programme, Hyster® Empty Container Handlers benefit from sophisticated technological advances that significantly reduce your cost of ownership and maximise operational efficiencies.

# FOR MAXIMUM PRODUCTIVITY, HYSTER STACKS UP

Hyster® Empty Container Handlers are the ideal solution to help maximise your productivity. The winning combination of superior engine systems and hydraulics, combined with the strength and durability of the mast and spreaders mean that you can always achieve the highest levels of productivity.

Hyster® trucks have been continually refined to realise increased cycle speeds and optimise yard capacity. The low weight front end and the position of the mast close to the truck body optimises stability, and combined with sophisticated variable hydraulics and 5 speed transmission help to reduce fuel consumption and tyre wear.

### Economy that works for you

Hyster® trucks are designed with low cost of ownership in mind. Well-integrated systems developed with high quality suppliers help to minimise the lifetime cost of operations. This new generation of Empty Container Handlers achieves the best fuel economy levels in the market, with increased savings on fuel consumption of up to 20%.

**CLEAR PRECISION**

**SUPERB VISIBILITY AIDS PRECISE POSITIONING OF CONTAINERS AT ANY HEIGHT FOR EFFICIENT LOAD HANDLING.**

## UNRIVALLED DRIVER COMFORT

As well as being tough, Hyster® Empty Container Handlers are also designed with the operator in mind. A sophisticated operator interface and intuitive controls within an area designed for convenience and comfort mean that the driver can always concentrate on the task in hand.

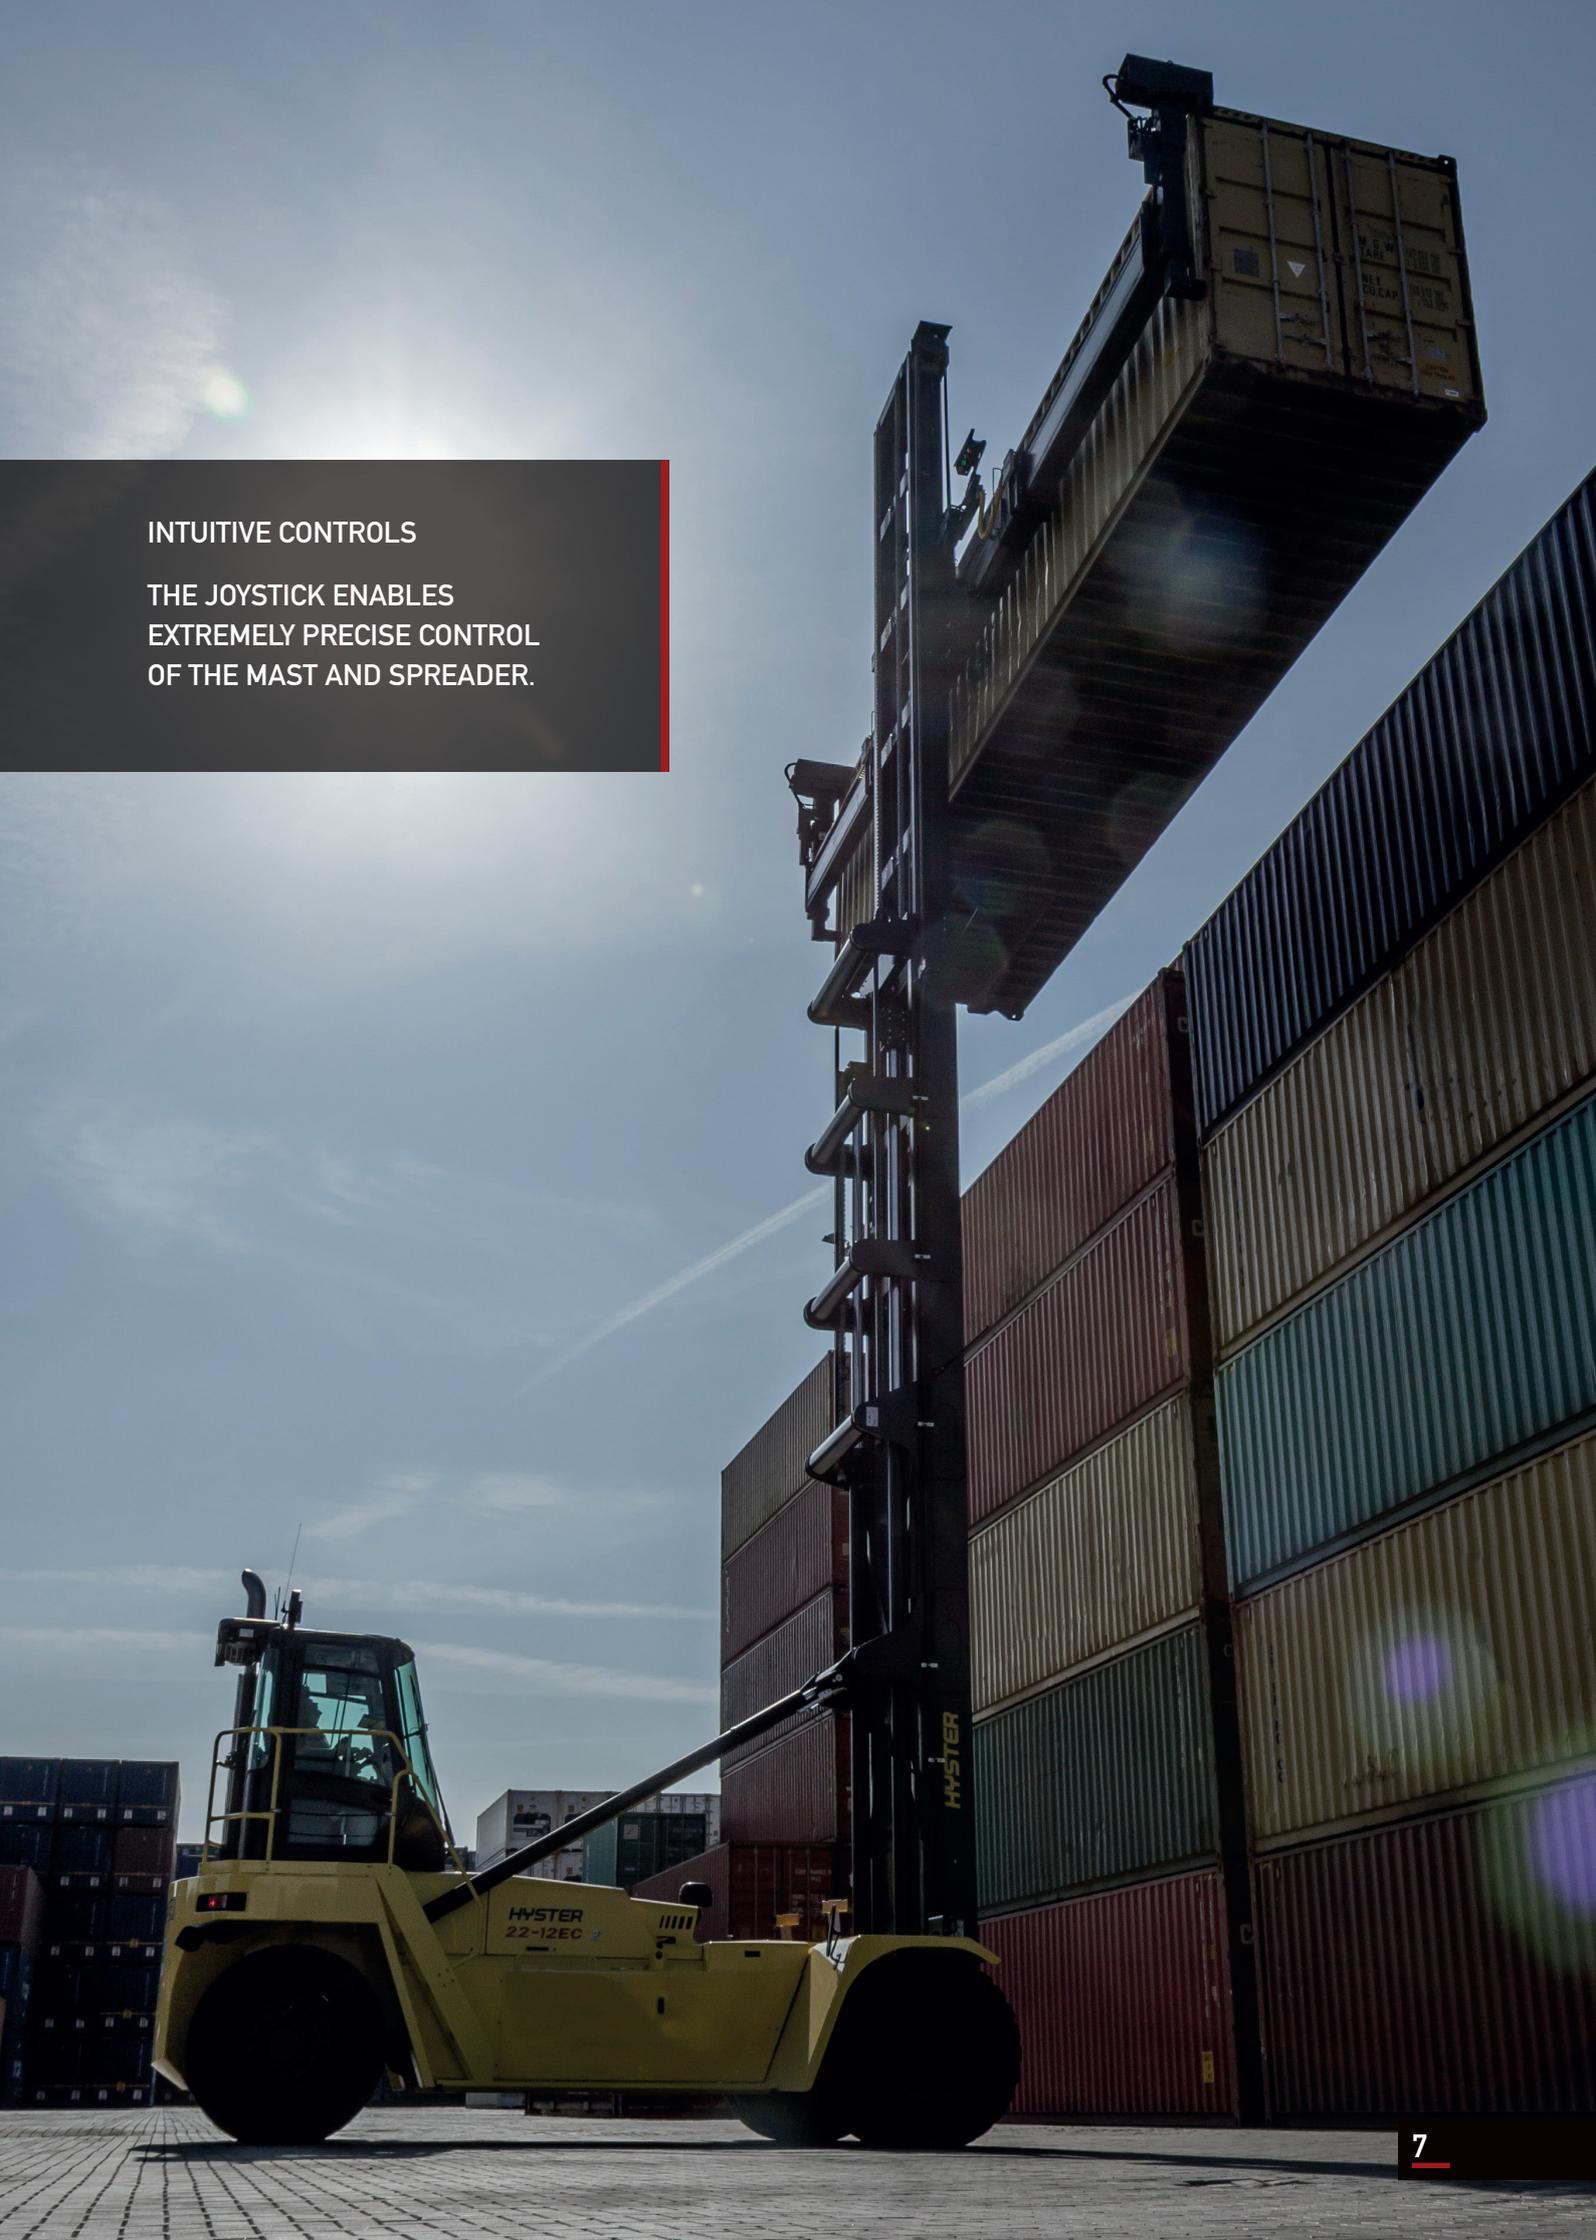

The position of the cab at the rear of the truck ensures excellent visibility for stacking or lorry loading, and when travelling the load can be carried low, which aids stability and reduces wear.

### Vista cab

The Hyster “Vista” cab is an environment designed to minimise operator fatigue and maximise productivity. It is spacious, with excellent height inside, offering all round visibility.

**INTUITIVE CONTROLS**

**THE JOYSTICK ENABLES  
EXTREMELY PRECISE CONTROL  
OF THE MAST AND SPREADER.**

# A SPREADER TO SUIT EVERY APPLICATION

Hyster® Empty Container Handlers are engineered to offer outstanding operating solutions with highly reliable integrated mast lift spreaders. Clever design maximises visibility of the working area and loads to ensure efficient and safe handling, whilst industry leading lift speeds aid productivity levels.

Specific engagement systems designed for different application and driver requirements mean these trucks are targeted to meet the particular needs of your business.

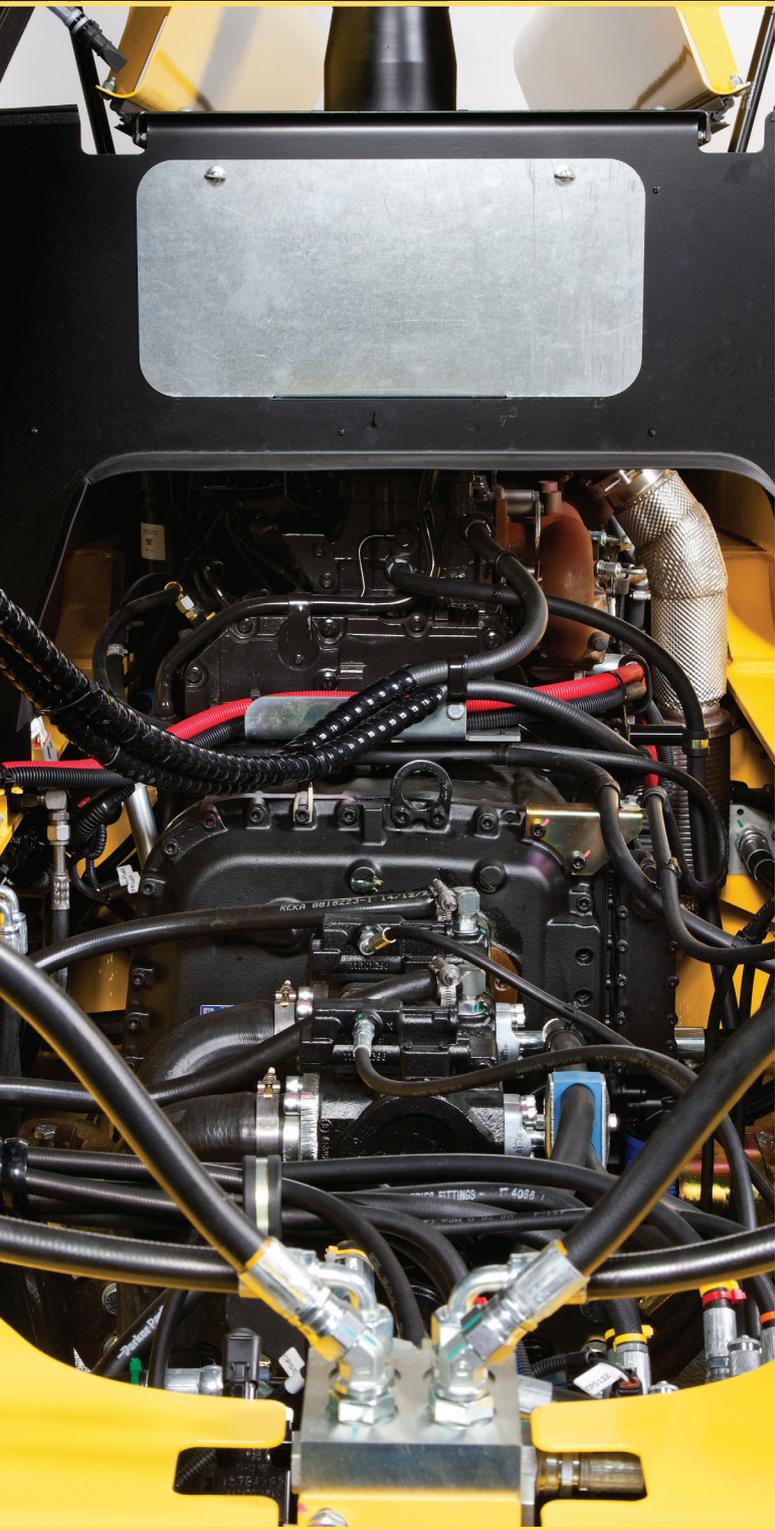

## Safe handling

The integral safety controls monitor operations and keep the driver fully informed, increasing operator confidence, even in the most challenging environments.

## SPREADER OPTIONS

- Model 584LA is a telescopic side lift spreader for the handling of two empty ISO containers simultaneously.
- Model 584LB is a telescopic side lift spreader for the handling of two empty ISO containers simultaneously.
- Model 584LD is a telescopic side lift spreader for the handling of two empty ISO containers simultaneously.
- Model 584LF is a telescopic side lift spreader for the handling of two empty ISO containers simultaneously.
- Model 586TB is a telescopic side lift spreader with vertical twistlocks for the handling of one single empty ISO and Binnencontainer with a width up to 8'6".
- Model 588TB is a telescopic side lift spreader with vertical twistlocks for the handling of single empty ISO containers.
- Model 589TB is a telescopic side lift spreader with vertical twistlocks for the handling of one single empty ISO and Binnencontainer with a width up to 8'6".

## CLASS LEADING UPTIME

Hyster® trucks are designed to make light work of servicing, with fast and clear access to all major components enabled by the large gull wing hood. Regular daily checks are facilitated by the clear design of all gauges and controls. These trucks are designed to operate reliably even in the harshest of conditions and offer the best possible uptime to keep your business running smoothly.

### Long service intervals

Extended service intervals ensure the maximum operational availability of your Hyster® Empty Container Handler. Major components are engineered for 500 hour service intervals, while the PC diagnostic system aids first time repair and preventative maintenance.

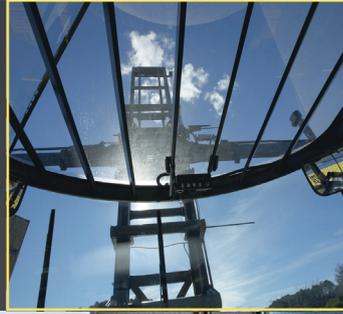

EASE OF SERVICE

CLEAR ACCESS TO MAJOR COMPONENTS  
EXPEDITES EASY MAINTENANCE.

RELIABILITY IN EMPTY CONTAINER HANDLING

50 YEARS OF HYSTER HERITAGE IN CONTAINER HANDLING AND SPREADER DESIGN PROVIDES SUPERB PERFORMANCE IN EMPTY CONTAINER HANDLING APPLICATIONS.

## INNOVATION YOU CAN TRUST

Hyster® has been conquering the world's most demanding applications for more than 80 years. A continual and rigorous programme of research and development means that our trucks are always at the forefront of technological excellence. Our world-class testing facilities ensure that each truck is designed to meet the most stringent quality controls, giving you the confidence to rely on Hyster® for unsurpassed strength and dependability.

Hyster® trucks have always had a strong reputation for robust design and durability. Renowned for producing extremely reliable and comfortable trucks, the current range has the added benefit of low lifetime cost of ownership.

## EMPTY CONTAINER HANDLERS

# GLOBAL OPERATION

A world leader in the manufacture of materials handling equipment, Hyster® offers a comprehensive range of Big Trucks including Heavy Duty Forklift Trucks, Empty Container Handlers, Laden Container Handlers and ReachStackers, all supported by a global parts supply operation to meet your materials handling requirements.

### Global Advantages

Hyster customers benefit from the expertise and resources of a worldwide manufacturing organisation with a global approach to product design, manufacturing, supply-chain administration and global distribution network.

We are able to maximise economies of scale and achieve consistent quality. At the same time, the company retains the flexibility to tailor products and solutions and to adapt production capacity in line with regional market demands.

### Tailored Solutions

A large proportion of Big Truck sales require special engineering and Hyster has a highly-experienced engineering team actively supporting specific application requirements.

## DEALER NETWORK

Our Dealer Network offer support in fleet management, parts supply, capital procurement and specialist training. Our carefully chosen dealers understand customer requirements and operating environments, and will assist in selecting the right lift truck and provide fast, reliable support.

## SERVICE SUPPORT

Your local Hyster® dealer offers a flexible, customised and comprehensive maintenance plan based on each truck's operating environment. Service programmes include scheduled inspections and maintenance, backed up by responsive on site service.
